

# Interface Engine Naming Schema

## *Include your Epic Interface ID in your Naming Schema!*

*This will save you a ton of time!*

This simple trick will save you a ton of time. When you are naming your interfaces in your engine, include the Epic Interface Queue ID in the name. For your inbound interfaces in your engine, you would include the Epic Interface Queue ID that is being sent from. For example, 574500 is your outbound SIU or Scheduling Interface in Epic. In your Engine, you name your interface

From\_EPIC\_SIU\_574500.

- From\_Epic\_PostCoding\_574780
- From\_Epic\_PowerPath\_Orders\_574438
- From\_Epic\_ProvUpd\_574000
- From\_Epic\_Relay\_ADT\_574706
- From\_Epic\_RobotRx\_Orders\_574602
- From\_Epic\_RTE\_Batch\_574272
- From\_Epic\_RTE\_Query\_574270
- From\_Epic\_SIU\_574500
- From\_Epic\_Softlab\_Orders\_574400
- From\_Epic\_Syndromic\_574714

For the outbound interface going to Epic, you include the ID of the Inbound EPIC interface. For example, the inbound EPIC SIU interface is usually 574 503. You would name the To\_EPIC\_SIU\_574503. Just looking at my list of interfaces, I know which interfaces feed which EPIC Interfaces.

- To\_Epic\_ARIA\_ORU\_574347
- To\_Epic\_ARIA\_SIU\_574503
- To\_Epic\_Blood\_Product\_Results\_574327
- To\_Epic\_CardioCom\_Doc\_Flowsheet\_574363
- To\_Epic\_Chartmaxx\_Documents\_574105
- To\_Epic\_Coding\_Query
- To\_Epic\_CVIS\_ORU\_574315
- To\_Epic\_Echo\_MFN\_574001
- To\_Epic\_EOB\_574103
- To\_Epic\_FinancialTransactions\_574751
- To\_Epic\_GEPACS\_Orders\_574313
- To\_Epic\_Items\_Usage
- To\_Epic\_MDM\_574107
- To\_Epic\_Medication\_Dispenses\_574611
- To\_Epic\_Muse\_574321
- To\_Epic\_NoticeofAdmission
- To\_Epic\_PaceArt\_Results\_574317
- To\_Epic\_Passport\_ADT\_574703

## *About D288 IT Solutions*

D288 IT Solutions is a consulting/service firm that focuses on the success of your integration. We offer a wide variety of consulting services to meet the needs of your organization.

In today's culture, it is not enough to be the typical consulting/service firm. There are dozens of organizations that can tell you what you already know or place a body in a chair. What every CIO and Director strives for in an outside firm is benefit joined together with partnership.

D288 IT Solutions is based out of Syracuse, NY and our workforce is based solely in the United States. Our consultants offer our clients expertise in their perspective technology, workflow and hospital experience.

**D288 IT Solutions, LLC** was founded by Kevin L. Frederick in 2010, a former Vice President and CIO of a health system, who was always in search of a company that could assist him in seeing the "big picture" and then help him achieve it in a practical approach.

D288 IT Solutions started in the early years with general HIT consulting. However, Kevin realized quickly that there was a large need for vendor neutral integration services. In 2013, D288 IT Solutions re-launched itself focusing on integration. At the same time, we launch a series of webinar to help the health care IT professional grow in their knowledge of HL7. "It is startling the number of individuals that have no foundation of what HL7 really is." states Kevin Frederick

"It has been an honor and privilege to serve every client." says Frederick, "Founding this organization has been an amazing adventure, and I am deeply humbled to be part of this company. My only regret, is that I did not do it sooner."

The goal of D288 IT Solutions, LLC is to support the IT advances of hospitals and healthcare through integration. To come along side and assist with their strategic vision and objectives.
